A/E/P Maguire Group Expands Focus on Rhode Island and Transportation

Local Engineer to Help Maguire Grow Business in State Where It Was Established in 1938

Providence, RI – As it continues to expand its operations throughout New England, A/E/P Maguire Group announces the hiring of Richard A. Bernardo, P.E., as Regional Transportation Director and RI Location Manager to take advantage of the firm’s position in Rhode Island’s state and municipal architectural, engineering, transportation, and construction services markets. Maguire is pleased to welcome him to its Providence office.

Mr. Bernardo has worked over 31 years in the engineering profession and has extensive experience in public works projects as both a consultant and a government employee. Over the past seven years, he has been a director of public works for the City of Cranston and the Town of Burrillville. Prior to that, he held various positions with major New England-based engineering firms. With degrees in civil as well as architectural engineering, Mr. Bernardo brings informed experience to current and future infrastructure and transportation efforts.

“As a Rhode Island resident, Mr. Bernardo knows full well the challenges that Rhode Island faces and shares its vision to focus the economy on knowledge-based, innovation industries,” says Maguire President and CEO Carlos Duarte. “As part of Maguire Group, he can help the State of Rhode Island develop, fund and construct the infrastructure and transportation projects it needs to support the growth of such industries. I’m confident his talent and experience will benefit our clients and their projects.”

About Maguire Group Inc.

Maguire Group was founded in Providence, Rhode Island over 70 years ago as a small civil engineering firm. Today, Maguire is a full-service, nationally recognized architectural, engineering, planning, and construction management organization. Throughout its history, Maguire has played an important role in the planning, design and construction of the infrastructure used in our daily life for thousands of clients—from tiny towns to Fortune 500 companies—across the country and around the world. That role continues today as part of the Metric Engineering Group.

About Metric Engineering Group, Inc.

Metric Engineering Group (MEG) is one of the nation's leading engineering, architectural, construction and emergency management organizations specializing in infrastructure and transportation for government clients. Today, the Group includes over 500 dedicated professionals in 25 strategically located offices throughout the eastern coast of the United States, Texas, Latin America, and the Caribbean. Ranked as #291 on the *Engineering News Record* Magazine’s list of “The Top 500 Design Firms,” MEG provides full-service project delivery, from conceptual design to construction, maintenance, and operation.
