A/E/P Maguire Group Organizes for Growth and Success: Mid-Atlantic Region

Foxborough, MA – As it continues to expand its operations throughout the Northeast and Mid-Atlantic, A/E/C Maguire Group Inc. announces changes to improve services and client support.

In the Mid-Atlantic, several organizational changes were announced to take advantage of the firm’s position in the state and municipal architectural, engineering and construction (A/E/C) services markets.

There were announcements regarding election to vice president for Mr. Matthew J. Macey, P.E., Manager of Maguire’s Mid-Atlantic Bridge Department; and for Mr. Michael S. Moorman, P.E., Manager of Maguire’s Mid-Atlantic Construction Management Department. “The Mid-Atlantic region is heavily involved with transportation and construction management projects,” says Tom Stockhausen, Senior Vice President and Mid-Atlantic Regional Manager. “Matt and Mike’s election to vice president positions reflects Maguire’s confidence in the future Pennsylvania transportation market and their ability to lead us to the next level in that market.”

Matt Macey, P.E.

Mike Moorman, P.E.

Maguire’s Mid-Atlantic region has seen growth and success in local transportation projects. Maguire has been the construction manager of well over a billion dollars in highway construction – including several of the largest projects in the state. Among these Pennsylvania projects are the award-winning widening of Route 322 in Lewistown (The Narrows Project); the I-99 project in State College; and the current widening of Route 28 in Pittsburgh. Maguire is also the lead design firm on the replacement of the Pennsylvania Turnpike’s Beaver Bridge and the new interchange with Route 18, and is also the structural engineer for renovations to Point State Park in Pittsburgh’s Golden Triangle.

When viewed with the corporate addition of Emergency Management Services to the firm’s already full-service line of primary disciplines, it is clear that Maguire Group is taking the steps necessary to be one of the top A/E groups in the nation. “These and other changes and investments reflect our commitment to a stronger client focus and an emphasis on quality results,” comments Maguire President/CEO Carlos A. Duarte, “I’m taking Maguire’s traditions forward into the 21st century – full service, quality performance, and client satisfaction are very important in this view of Maguire. Our employees are crucial in reflecting these values to our clients and consultants.”

About Maguire Group Inc.

Maguire Group was founded in Providence, Rhode Island over 70 years ago as a small civil engineering firm. Today, Maguire is a full-service, nationally recognized architectural, engineering, planning, and construction management organization. Throughout its history, Maguire has played an important role in the planning, design and construction of the infrastructure used in our daily life for thousands of clients—from tiny towns to Fortune 500 companies—across the country and around the world. That role continues today as part of the Metric Engineering Group.

About Metric Engineering Group, Inc.

Metric Engineering Group (MEG) is one of the nation's leading engineering, architectural, construction and emergency management organizations specializing in infrastructure and transportation for government clients. Today, the Group includes over 500 dedicated professionals in 25 strategically located offices throughout the eastern coast of the United States, Texas, Latin America, and the Caribbean. Ranked as #291 on the *Engineering News Record* Magazine's list of "The Top 500 Design Firms," MEG provides full-service project delivery, from conceptual design to construction, maintenance, and operation.
