Maguire Group Expands Environmental Capabilities with Growing Energy Services Division

New Hire Joins Maguire's Expanding Energy Services Division, focused on Marcellus Shale

Pittsburgh, PA – As it continues to expand its environmental capabilities, Maguire Group announces the hiring of Jason Anderson as an Environmental Scientist providing support for Maguire's expanding Energy Services Division. Maguire is pleased to welcome him to its Pittsburgh office, where Jason will report to Brian Sterner, Mid-Atlantic Environmental Manager.

Mr. Anderson received his Bachelor of Science degree in Landscape Architecture from West Virginia University, and is well versed in site planning, design, and construction, including erosion and sedimentation control measures and site restoration. In addition to his work on wetland delineations and mitigation, Mr. Anderson is also experienced in Construction Management, including the inspection of storm drainage installations, site grading, and roadway paving.

"The addition of Jason to our team was a key step in the development of our growing Energy Services Division," states Sterner. "He possesses the right mix of 'energy' and experience needed to fully support our existing and future natural gas-related projects, including environmental investigations, GIS analyses, Erosion and Sedimentation Control Plans, and permitting."

Engineering services for Maguire's Energy Services Division is expanding as well, with several Maguire team members, including P.E.s, participating in the Pennsylvania Department of Environmental Protection's (PADEP) Regulatory Training for the Oil and Gas Industry to facilitate the processing of Expedited Review permits.

Maguire Group is proud to be a member of the Marcellus Shale Coalition and PA Independent Oil and Gas Association, supporting the safe exploration, production, and delivery of natural gas, as the demand for clean and sustainable energy sources has gained increased importance, not only in our region, but around the world.

About Maguire Group Inc.

Maguire Group was founded in Providence, Rhode Island over 70 years ago as a small civil engineering firm. Today, Maguire is a full-service, nationally recognized architectural, engineering, environmental, planning, and construction management organization. Throughout its history, Maguire has played an important role in the planning, design and construction of the infrastructure used in our daily life for thousands of clients—from tiny towns to Fortune 500 companies—across the country and around the world. That role continues today as part of the Metric Engineering Group.

About Metric Engineering Group, Inc.

Metric Engineering Group (MEG) is one of the nation's leading engineering, architectural, construction and emergency management organizations specializing in infrastructure and transportation for government

clients. Today, the Group includes dedicated professionals in 25 strategically located offices throughout the eastern coast of the United States, Texas, Latin America, and the Caribbean. Ranked as #291 on *Engineering News Record* Magazine's list of "The Top 500 Design Firms," MEG provides full-service project delivery, from conceptual design to construction, maintenance, and operation.
